

## INSTRUCTIONS

1. Using your sublimation printer, print the design you want to use onto sublimation paper.
2. Trim the white edges off of your design.
3. Remove the plastic wrap, lid and straw from your tumbler.
4. Wrap your printed transfer around your tumbler.
5. Secure your transfer to your tumbler using heat transfer tape.
6. Adjust your tumbler press to a medium pressure. This should mean that your press closes snugly around your tumbler.
7. Set your tumbler press to 385F.
8. Set your tumbler press to 60 seconds.
9. Wrap your tumbler and transfer sheet in blowout paper.
10. Once your tumbler press is heated up, slide your tumbler into the press and close it.
11. After 60 seconds, open your press, rotate your tumbler 90 degrees and close your press again.
12. Let your tumbler cook for an additional 60 seconds.
13. When finished, take the tumbler out of your press using your heat gloves.
14. Quickly rip your transfer sheet off of your tumbler and reveal your finished product!
